STAKEHOLDER ENGAGEMENT WIN-WIN:
BETTER RESEARCH, BETTER LIVES

Stakeholder Engagement Consultants

Christie Bartels, MD, MS is a health services researcher and rheumatologist at University of Wisconsin School of Medicine and Public Health who researches improving cardiovascular health and reducing disparities among patients with rheumatologic and other specialty conditions. She has successfully developed EHR-supported clinic protocol interventions for rheumatology/specialty staff that doubled odds of primary care follow up for BP, reduced rates of high BP, and improved smoking cessation referrals 20-fold. Dr. Bartels has led patient stakeholder engaged research on these interventions.

Elizabeth Cox, MD, PhD is the Director of the Program of Research on Outcomes for Kids (PROKids) at the University of Wisconsin-Madison School of Medicine and Public Health (UWSMPH) and a practicing pediatrician. Dr. Cox has been the principal investigator (PI) of multiple research awards that leverage the voices of children and their families to deliver safer, higher quality pediatric care. Currently, she is the PI of a PCORI-funded multi-site trial examining the effectiveness of family-centered interventions for children with type 1 diabetes and co-PI on an NIH U19 to evaluate clinical utility of PROMIS pediatric item banks for chronically ill children and their families. She also serves as co-investigator or consultant on multiple other PCOR initiatives and funded grants and has been a member of PCORI’s Improving Healthcare System’s Advisory Panel. Through her experiences and training, Dr. Cox has developed extensive knowledge and skills to integrate the diverse perspectives of patients, caregivers, and other stakeholders across the research trajectory. She is also an Associate Professor of Pediatrics and Population Health Sciences at UWSMPH. Email: ecox@wisc.edu

Betty Chewning, PhD is a Professor in the School of Pharmacy whose research has integrated the perspectives of patients, providers, teachers, administrators and other community partners throughout her research career. In collaboration with Dr. Cox, her goal is to assist people in planning meaningful, iterative stakeholder engagement through workshops and templates, which assist blended stakeholder groups. It is her belief that diversity of voices and views are needed to improve the research process and achieve the most meaningful research outcomes for the target group. Email: betty.chewning@wisc.edu

Jane Mahoney, MD, Professor in UW Division of Geriatrics, Director of Community-Academic Aging Resource Network (CAARN), Director of Wisconsin Alzheimer’s Institute (WAI), Director of Dissemination and Implementation Resources at the Institute for Clinical & Translational Research (ICTR), Affiliate Faculty of UW Institute on Aging.

Edmond Ramly, PhD, is an assistant professor in the Department of Family Medicine and Community Health. He applies expertise in health systems engineering to improving collaboration between the primary care medical home and the medical neighborhood, starting with specialty care (e.g. high blood pressure follow-up) and long term care. Dr. Ramly approaches stakeholder engagement and co-design from the complementary perspectives of human factors and implementation science. Email: ramly@wisc.edu
