

Dissemination Research and Implementation Science Seminar (DRISS)

Hosted by: Dissemination and Implementation Launchpad & Heidi Brown, MD

Daniel Almirall

Associate Professor
Co-Director, Data Science for Dynamic Intervention Decision-making Center (d3c)
Department of Statistics, College of Literature, Sciences, and the Arts
Survey Research Center, Institute for Social Research
University of Michigan

A Multi-level Adaptive Implementation Strategy (MAISY) offers an approach to precision implementation of evidence-based practices in real-world settings. MAISY guides implementers on how best to adapt (e.g., augment, intensify) implementation strategies based on context and needs at multiple levels (e.g., clinic, practitioner).

MAISY: Multilevel Adaptive Implementation Strategies and Associated Optimization Trial Designs

Friday, Aug 12

12:00 – 1:00 pm

Zoom

We hope you can join us!
