

**Are you a non-traditional predoctoral student
attending graduate school part-time?**

**Is your field of study focused on improving
human health?**

Nontraditional predoctoral students, who return to school after starting their career, bring a wealth of experience and insight that informs their focus and benefits other learners.

ADEPT is a workforce development program to support part-time PhD students who identify as a member of a group historically underrepresented in the health sciences.

RESOURCES AND OPPORTUNITIES

- Awarded an \$18,000 scholarship (\$6,000 per semester: fall, spring, and summer)
- Interact and network with other scholars enrolled in programs supported by the UW-Madison Collaborative Center for Healthy Equity (CCHE)
- Training opportunities including: scientific writing, responsible conduct of research, team science, and dissemination and implementation sciences
- Mentorship training opportunities for mentors, mentees, and peer mentorship
- Invited to participate in a weekly writing group via Zoom

ELIGIBILITY

- Part-time PhD students who identify as a member of a historically underrepresented group in science as defined by the National Institutes of Health (NIH)
- Entering or continuing in a graduate program that supports clinical and translational science with a focus on improving the health of communities
- Any health sciences program including clinical investigation, nursing, sociology, counseling psychology, pharmacy, anthropology, human development and family studies, and others
