JOIN US FOR RESEARCH DAY!

Whether you are a new investigator curious about ICTR services or are already familiar with what we offer, it will be a day of learning and networking.

Who should attend?
This event is for anyone involved in or interested in research with health implications. ICTR serves researchers across disciplines at UW and the Marshfield Clinic Research Institute. Unfamiliar with translational research? That’s okay! You will learn how ICTR can accelerate your research to impact lives and communities.

What is ICTR?
ICTR helps researchers move their findings from experimental settings into real world use in clinics and communities (“translating” research into practice). We do this through career development programs (training awards, education, pilot funding), as well as services that support the development and delivery of research projects (study design consultations, data analysis services, guidance on community partnerships and recruitment of diverse study participants).

AGENDA

8:30 - 9 am . . . . Registration and Continental Breakfast
9 - 9:15 am . . . . Introduction and Welcome
9:15 - 10:15 am . . Building High-Impact Translational Teams
10:20 - 11:15 am . . Lightning Poster Presentations
11:20 am - 1 pm . . Poster Reception with ICTR Resource Tables + Networking Lunch
1 - 2 pm . . . . . . Keynote by Dr. Lyric Jorgenson, Acting NIH Associate Director for Science Policy
2:15 - 3:15 pm . . Concurrent Sessions: “Facilitating Successful Research Studies with the Protocol Development Program” or “The UW Data-Driven Learning Health System: Building the System”
3:20 - 4:15 pm . . Cross-Institutional and Multi-Site Studies
4:15 - 4:30 pm . . Closing
